Sunnyvale, CA 94089

Education

BS Computer Science, Virginia Commonwealth University,
Summa Cum Laude Graduate, Honors College Scholar, Business Minor

Graduation: May 2025
GPA: 3.92

Skills

Programming Languages: Java | Scala | Python | C | SQL | Bash | GraphQL

Technical Skills: RESTful APIs | Elasticsearch | GitHub | Big Data | Cloud Computing | DevOps | Agile | Unit Testing

Language skills: Fluent English, Conversational Spanish

Experience

Software Engineer 2, Walmart Global Tech, Sunnyvale California July 2025 - Present

- Architected and delivered "SEO On-the-Fly" (OTF) and ESPRO Notifications in production, enabling real-time, scalable AI recommendation workflows for 17,000+ active sellers with a 20% engagement rate.
- Led the end-to-end implementation of "Quick Start Recommendations" (QSR) for Onsite Retargeting (OSR); recognized by division leadership as the primary engineer driving production delivery under a compressed timeline.
- Spearheaded the migration of Offer Exposure SEO from JDK 17 to JDK 21, optimizing backend system performance, modernizing the stack, and delivering a seamless production rollout with zero downtime.
- Engineered an optimized data-gathering pipeline for Mint Reporting, slashing processing times by 85% (from 2 weeks down to 2 days), and developed a reusable method for handling complex nested data types in Elasticsearch.
- Co-developed an MCP server and chatbot POC to integrate SEO/Social Commerce APIs, implementing App-to-App authentication to secure downstream services.
- Recipient of the "Making the Difference" Award (Q2 2026) for demonstrating exceptional ownership and accelerating cross-functional delivery with CRM and Martech teams.

Software Engineer Intern 2, Walmart Global Tech, Sunnyvale, California June 2024 - August 2024

- Headed the design and development of a Tagging Service which incorporated a RESTful API using Scala and the Play framework, integrated with a Elastic Search database.
- Utilized agile methodologies and participated in daily scrum meetings throughout the development of my project.

Cyber Forensics Intern, Virginia State Police, Richmond, Virginia September 2024 - April 2025

- Engaged in data analysis with data collected from devices using data carving techniques.
- Utilized digital forensic tools and techniques like file recovery and metadata analysis.

AI Research Intern, Commonwealth Cyber Initiative, Richmond, Virginia June 2023 - August 2023

- Collaborated as a team with PhD students to develop and test algorithms and methods of Deep Reinforcement Learning (DRL).
- Utilized Python, Pytorch and DRL methodologies to build testing environments, implemented developed algorithms, and observed their performance.

Awards, Licenses and Certifications

- Making the Difference Award - Walmart Global Tech (Q2 2026)
- Functional Programming in Scala - École Polytechnique Fédérale de Lausanne
